

Downloading data from Tableau Public

If you would like a **cross tab** table of the data shown in a graph or table then:

- click on the graph or table
- click on the download link at the bottom right hand side of the screen
- select **cross tab**
- your download will start

The download options also allow you to download:

- an **image** of the page (.png format)
- the **data** in column format
- a **PDF** of the entire visualisation (but not the tables linked to from the table menu)
- the entire **Tableau Workbook** for use in the free Tableau reader tool
